

**impossible2Possible** (i2P) is a non-profit organization dedicated to **educating**, **inspiring**, and **empowering** the global community to reach beyond their perceived limits and make positive change in the world.

i2P hosts three high-profile Expeditions a year - one elite journey, and two that are Youth-based - to unique and contrasting locales all around the world, with the goal of highlighting that region's social and environmental issues while empowering youth to make a difference.

As part of this program, we provide Experiential Learning Programs (ELPs) to thousands of schools and students - spread all over the world.

**Empower.**  
**Educate.**  
**Inspire.**

Each Expedition includes a comprehensive, unique ELP that contains videos, experiments, a fundraising project, education modules and a unique website to experience the journey.

**How can your school be involved?** It's Easy (and Free!)

- Your classroom can register to follow the Expeditions - receiving daily updates, videos, photos, and education modules;
- Your classroom can participate in live video conferences, submit questions and have them answered in real-time;
- You can have i2P team members speak to your students;
- Your students can apply to be Youth Ambassadors; and
- Your students can be empowered to make a difference in the community and world around them.

CLINTON GLOBAL INITIATIVE UNIVERSITY

Over the last few years i2P has been proud to partner with organizations such as Simon Fraser University, Pepperdine University, The United Nations Educational, Scientific, and Cultural Organization (UNESCO), and to have been honored by the Clinton Global Initiative for initiatives that are making a positive impact in the world.

We put every effort into ensuring content is engaging and appropriate for students of all ages – from kindergarten to University - and the i2P Experiential Learning Program has been touted as “truly groundbreaking” by Apple Distinguished Educators!

“

*Changing the way we educate our children begins with providing unique, real-world experiences in the classroom; Providing opportunities that our students can take ownership over, integrate technology and create meaningful projects. Southside Elementary's 5th grade students worked collaboratively to create podcasts which were aired on the local radio station, and technology to create posters to advertise their podcasts. Being able to witness the collaboration between our students and the i2P team brought everything to life. Thanks for the amazing experiences!*

**EXPERIENTIAL LEARNING PROGRAMS**

“  
*i2P provided a real-world connection to our curriculum learning that as a teacher you are always striving to create. We were able to apply what we were learning to the real world as we learned about it! Being part of the i2P community was enormously motivational and demonstrated to me and my class that anything is possible with determination!*
